a) might not worn  
b) might not have worn  
c) might have not worn  
d) might didn't wear

11. She passed with the highest score. She \_\_\_\_ cheated — she is genuinely brilliant.  
a) might not have  
b) may not have  
c) couldn't have  
d) wouldn't have
12. He said he was at work, but he \_\_\_\_ the truth. I saw his car at the shopping centre.  
a) may not have been telling  
b) may not told  
c) may have not been telling  
d) may didn't tell
13. I called you three times, but you didn't answer. You \_\_\_\_ asleep.  
a) could been  
b) could have been  
c) could has been  
d) could have be
14. The plants are all dead. I think the cleaner \_\_\_\_ to water them while we were on holiday.  
a) might forgotten  
b) might have forget  
c) might have forgotten  
d) might has forgotten
15. He \_\_\_\_ the whole marathon. He was still full of energy at the finish line.  
a) can't have run  
b) might not have run  
c) may not have run  
d) couldn't run
16. Where did I put my keys? I \_\_\_\_ them in my jacket pocket.  
a) may put  
b) may have put  
c) may have putted  
d) may has put
17. The shop is closed. They \_\_\_\_ early today because of the holiday.  
a) could closed  
b) could have close  
c) could has closed  
d) could have closed
18. She was supposed to arrive at six, but she's still not here. She \_\_\_\_ the wrong bus.  
a) might have taken  
b) might taken  
c) might have took  
d) might has taken
19. He \_\_\_\_ the message. I sent it to his old email address by mistake.  
a) may not received  
b) may not have received  
c) may have not received  
d) may didn't receive
20. She knew all the answers immediately. She \_\_\_\_ the test questions in advance.  
a) could seen  
b) could have saw  
c) could has seen  
d) could have seen

## Answers

1. a) might not have known
2. b) may have rained
3. c) could have left
4. c) might not have studied
5. d) could have thrown
6. d) may not have read
7. a) must have trained
8. c) might have gone
9. d) must have spent
10. b) might not have worn
11. c) couldn't have
12. a) may not have been telling
13. b) could have been
14. c) might have forgotten
15. a) can't have run
16. b) may have put
17. d) could have closed
18. a) might have taken
19. b) may not have received
20. d) could have seen

# Explanations

## 1. “might not have known” (a)

'Might not have known' speculates that it is possible she did not know about the party. The structure is: might + not + have + past participle.

## 2. “may have rained” (b)

'May have rained' speculates about a past event. The wet ground is evidence, but we are not certain. Structure: may + have + past participle.

## 3. “could have left” (c)

'Could have left' speculates about a possible past action. The speaker thinks the restaurant is one possible place the wallet might be.

## 4. “might not have studied” (c)

'Might not have studied' suggests a possible reason for the failure. The negative form is: might + not + have + past participle.

## 5. “could have thrown” (d)

'Could have thrown' speculates about what possibly caused the damage. It's one possible explanation.

## 6. “may not have read” (d)

'May not have read' speculates that she possibly has not read the email. Structure: may + not + have + past participle.

## 7. “must have trained” (a)

'Must have trained' is a logical conclusion — running a marathon in under three hours requires serious training. This is near-certainty, not just a possibility.

## 8. “might have gone” (c)

'Might have gone' speculates about a past action. Note: the past participle of 'go' is 'gone', not 'went'.

## 9. “must have spent” (d)

'Must have spent' is a confident deduction. The excellent result makes the speaker almost certain that a lot of time was invested.

## 10. “might not have worn” (b)

'Might not have worn' speculates about a possible past omission. The sunburn suggests this is possible but not certain.

## 11. “couldn't have” (c)

'Couldn't have cheated' means it is impossible that she cheated — the speaker is certain based on the evidence. 'Wouldn't have' means she would not have chosen to cheat, which is about willingness, not impossibility. 'Might not have' or 'may not have' would only express uncertainty.

## 12. “may not have been telling” (a)

'May not have been telling' speculates about a past ongoing action. The evidence (his car elsewhere) suggests he was possibly lying.

## 13. “could have been” (b)

'Could have been asleep' speculates about a past state. The unanswered calls suggest sleep as one possible explanation.

**14. “might have forgotten” (c)**

'Might have forgotten' speculates about a possible past omission. The dead plants suggest the cleaner possibly forgot to water them. Structure: might + have + past participle.

**15. “can't have run” (a)**

'Can't have run' means it seems impossible — someone who ran a full marathon would not be full of energy. The speaker is very sure he did not run the whole distance.

**16. “may have put” (b)**

'May have put' speculates about a past action. The past participle of 'put' is 'put' (irregular — it does not change).

**17. “could have closed” (d)**

'Could have closed' speculates about a possible reason the shop is shut. The holiday is one possible explanation.

**18. “might have taken” (a)**

'Might have taken' speculates about a past mistake. Note: the past participle of 'take' is 'taken', not 'took'.

**19. “may not have received” (b)**

'May not have received' speculates that the message possibly did not reach him. The wrong email address makes this likely.

**20. “could have seen” (d)**

'Could have seen' speculates about a possible past event — perhaps she had access to the questions before the test.
