16. a) twisted / was running
17. b) went
18. c) tried / were talking
19. a) was typing / crashed
20. a) was / swam

Explanations

1. “was watching / rang” (b)

Use Past Continuous 'was watching' for the background action in progress, and Past Simple 'rang' for the interrupting action.

2. “was cooking / rang” (d)

'While' introduces the longer background action (Past Continuous), and the doorbell ringing is a short interruption (Past Simple).

3. “went / bought” (d)

Both actions are completed events in sequence, so we use Past Simple for both.

4. “were / doing” (c)

The question asks about an action in progress at a specific time (8 o'clock), so we use Past Continuous.

5. “arrived / was raining” (b)

'Arrived' is a completed action (Past Simple), while 'was raining' describes the weather in progress at that moment.

6. “was painting / fell” (c)

'Was painting' is the background action in progress; 'fell' is the sudden interruption.

7. “played” (a)

'All afternoon' emphasizes a completed period of time, so Past Simple 'played' is more natural here.

8. “were writing / was marking” (d)

Both actions were happening at the same time in the past, so both use Past Continuous.

9. “lost / was waiting” (a)

'Lost' is a sudden, completed action; 'was waiting' describes what was happening when it occurred.

10. “heard / woke” (b)

Both are quick, completed actions in sequence, so both use Past Simple.

11. “was sleeping / was reading” (a)

Both actions were in progress at a specific time (midnight), so both use Past Continuous.

12. “was shining / left” (d)

'Was shining' describes the weather condition; 'left' is a completed action.

13. “was jogging / met” (c)

'Was jogging' is the background action; 'met' is the sudden event that happened during it.

14. “got” (b)

A specific completed event at a definite time in the past uses Past Simple.

15. “were you doing / happened” (a)

The question asks about an ongoing action interrupted by a sudden event.

16. “twisted / was running” (a)

'Twisted' is a sudden action; 'was running' is what was happening when it occurred.

17. “went” (b)

A completed trip with a specific duration uses Past Simple.

18. “tried / were talking” (c)

'Tried' is a completed attempt; 'were talking' describes what was happening at that time.

19. “was typing / crashed” (a)

'Was typing' is the ongoing action; 'crashed' is the sudden interruption.

20. “was / swam” (a)

Both describe past states and habits: 'was' for state and 'swam' for regular activity (not happening at one moment).
